PROFESSIONAL SUMMARY

Motivated and detail-oriented AI Developer with hands-on experience in building GenAI-powered applications using LLMs, LangGraph, LangChain, and RAG pipelines. Proficient in Python, FastAPI, and API integrations for real-time data processing. Experienced in developing scalable AI systems, chatbots, and intelligent agents that solve real-world problems. Seeking to contribute strong GenAI and backend development skills in a fast-paced, innovation-driven environment.

TECHNICAL SKILLS

Languages

Python, SQL, JavaScript

Vector Databases

ChromaDB, FAISS

Frontend & Apps

HTML, CSS, Tailwind CSS, Streamlit

AI / GenAI

LLMs, LangChain, LangGraph, RAG, Prompt Engineering, AI Agents, OpenAI API, Groq API, Embeddings, Vector Search

Databases

MySQL, PostgreSQL

Tools

Git, GitHub, VS Code, Postman

Backend & APIs

FastAPI, REST APIs, Pydantic, Async Processing, Pytest

Cloud & DevOps

AWS EC2, S3, IAM, Lambda, API Gateway, CloudWatch, Docker, CI/CD, GitHub Actions

Core Concepts

OOP, Data Structures and Algorithms, DBMS, Computer Networks

PROFESSIONAL EXPERIENCE

AI Developer

Syncevo Technologies Pvt. Ltd.

11/2025 – Present

- Developed an AI-powered customer support chatbot using LLaMA 3 (Groq API) and LangGraph, automating ISP customer queries related to connectivity and services.
- Implemented tool calling for real-time network/service data retrieval, reducing manual query handling by ~30-40%.
- Built a document intelligence system using PyPDF2 and Tesseract OCR, enabling accurate Q&A from manuals, FAQs, and service guides.
- Designed thread-based conversation memory to maintain context across multi-turn interactions.
- Optimized performance using async processing and streaming responses, improving response speed and user experience.
- Handled 1000+ user queries per day, ensuring scalability and reliability of the system.
- Collaborated with backend teams to integrate REST APIs and internal systems for seamless deployment.

PROJECTS

AI Chatbot with Tool Calling & Document Intelligence

Tech: Python, LangGraph, Groq API, PyPDF2, Tesseract OCR

- Built an LLM-powered chatbot with agentic workflows and multi-turn conversation support.
- Implemented tool calling to fetch real-time data via external APIs (e.g., OpenWeather API).
- Developed PDF and OCR-based Q&A system for extracting information from structured and unstructured data.
- Designed conversation memory module using thread-based state management.
- Improved system efficiency using async execution and streaming responses.

AI Insurance Premium Prediction System

Tech: Python, FastAPI, Streamlit, Scikit-learn, Pandas

- Developed a machine learning model to predict insurance premiums based on user features.
- Built FastAPI-based REST APIs for real-time predictions and backend processing.
- Designed a Streamlit UI for interactive user inputs and result visualization.
- Performed feature engineering: BMI, age groups, risk scoring, city tier classification.
- Implemented Pydantic validation and integrated trained model (model.pkl) into production pipeline.

EDUCATION

B.Tech in Electronics & Communication Engineering

2022 – 2025

Jharkhand University of Technology, Bokaro

- CGPA: 7.5/10

ACHIEVEMENTS & LEADERSHIP

Achievements & Leadership

- Solved 200+ DSA problems on GeeksforGeeks (arrays, trees, graphs, DP).
- Demonstrated leadership skills by coordinating team tasks and ensuring timely delivery.
- Adaptable and proactive in fast-paced, collaborative environments.
